Simulated M240 Machine Gun

The M240 is the new workhorse of the mounted machine gun crews with thousands now employed with armies around the world.

A generally reliable automatic weapon in 7.62mm caliber, it provides good suppression and support at extended ranges.

The VSS M240 is a highly detailed simulated weapon that provides trainees with various degrees of weapon readiness drills, marksmanship and engagement roles, whilst necessitating the 'immediate actions' required upon a stoppage.

Features:

- Detailed Replica Weapon
- Functioning feedcover and feedplate
- Support 'load' Drills with replica rounds
- Magazine Bin Change Over
- Operable Triggers and Safety
- Simulates malfunctions and immediate action drills
- Electric recoil system

Used by:

Australian Army
UK MOD
Colombian Police Force

Used for:

Weapon handling procedures
Immediate action drills
Suppressive fire training
Target Identification
Rules of engagement training
Crew served weapon SOP training
