

Used by:

Australian Army UK MOD
Colombian Police Force French Navy

Used for:

Weapon handling procedures
Immediate action drills
Suppressive fire training
Target Identification
Rules of engagement training
Crew served weapon SOP training

Simulated GAU21 Gun

Virtual Simulation Systems GAU21 Training Gun - full metal construction. Maintenance free operation. Classed non gun full imitation. Fully built in house at VSS.

Features:

- High Detail all metal replica GAU21
- Selectable gun safety - sensed
- Functionality to load weapon - sensed
- Dummy inert rounds to seat - sensed
- Functional feed tray covers - sensed
- Robust control design with redundancy for the highest possible uptime during training
- Recoil module.
- Variable fire rates - sensed
- Correct Weight and balance
- Adjustable azimuth and elevation limits (Standard Mount)
- Correct Trigger resistance - sensed
- Ammunition feed Chute can be disconnected - sensed
- Instructor triggered stoppages
 - 1.Runaway gun
 - 2.Triggered Stoppages
 - 3.Immediate stoppages
 - 4.Ammunition cook-off
- Maintenance free design
- Retracting bullet release (to enable reloading procedures when weapon is empty)
- Correct force and travel of charging handles
- Standard COTS interfaces and Windows device recognition
- (Optional) Bullet release for reloading procedures - sensed
- (Optional) NVG Muzzle Break
- (Optional) Stand alone audio module
- (Optional) Wind torque module on the weapon mount
- Available to system integrators or as a full standalone simulated training solution by VSS
